

Open Door day 20 september 2009

Sunday the 20th of september we will once again organize a open door day. You are invited to visit us between 12:00h and 16:00h. There will be a number of activities, such as a secondhand/prototype-shop, guided tours, food- and supper-stands and you are also invited to step into a Burton with a kitcar-builder and go for a small testdrive. You can combine a visit to us this day with the local Chocolate-fest in the old city-centre of Zutphen.

I-want-a-roof-on-my-Burton-day:

Preceding to our open door day we will organize a special meeting to give Burton-owners all the information on putting a roof on their Burton. This so-called I-want-a-roof-day used to be a separate event on our agenda, but this time we hope that we can combine it with our open day. If you are interested in buying a hard- of softtop for you Burton, or are you just curious about the possibilities, come over to Zutphen on september the 20th, 11 o'clock.

24H of Spa Francorchamps

Finally it is going to happen, a Burton is going to participate in the 24h of Spa Francorchamps for 2CV-like cars. The Belgian Burton-specialist SMDW is building a racecar especially for this race. So if you want to see this mean race-Burton in action, come to the circuit on the 17th and/or the 18th of oktober. During the race you can freely walk through the pits and watch the 2CV-racers and engineers form close by. There is a meeting for 2CV-like cars on the parking lot of the circuit, and even a campsite is you want to stay for the night. On Sunday-afternoon we will share the information for participation in next years race. So if you are interested in racing a Burton next year, be sure to be there. Below you see a picture of the rolling chassis being prepared for the race.

Burton-Events

Together with a company called 'Ducktrail' we organize a spectaculair rally trough 'the green hart' in the Netherlands. This rally is organized for 8 to 38 people, so it makes a proper business-relations-event. Every car is equiped with a softtop and a pair of caps and goggles, so the participants don't have to worry about the Dutch weather. Look at the following website for more information: www.burtonevents.nl

Almost 10 Years Burton

In spring of 2010 the Burton exists 10 years, and therefore we want to compile a special book. We are looking for exepcional, funny and cool pictures and story's. So send us your best Photo or story and maybe you will make it into the book.

Delivery status Burton Body

The time it takes to delives a body is now up to 6 months. This is due to the Financial crisis in the car-manufacturing-branche, which effect our parts-supliers in Tsjech, and our good sales in 2009. Our production is now up and running again, and we expect that we can bring back the time of delivery to several weeks.

Burton 2CV parts on tour

This year we started with a roadshow through Europa visiting all important 2CV-shows to expose ourselves more with our new parts. Our next stop we'll be Spa Francorchamps

New products

New key fobs! A friend of ours designed a couple of really neat key fobs. We have ofcourse a 2CV in bleu of red, a Dyane in orange, or a Delivery-2CV in grey. €6,-

Socket for the nut on the end of the steeringrods. A really clever tool for removing and tightening this castle-nut. Now for €12,-

Bolt M9x16 and M9x35. These uncommon bolts became more and more rare. We started producing these bolts againg and they are nog available for €2,- a piece.

Agenda:

Open Door day

20 september 2009

I-want-a-roof-day

10 oktober 2009

24h Spa-Francochamps
