

Newsletter April 2011

The first newsletter of 2011

Now that spring has come we arrive with lots of news. 2011 started with the traditional New Years drink and the Burton Owners Club members meeting. We also started setting up the overhauling equipment and machines we bought from Vege for our overhaul department. And we worked on the secret designstudio of Dimitri. The shop and storage facility have also been upgraded.

Burton is now live on Twitter and Facebook

Iwan has been active on [LinkedIn](#) for quite some time now but you can also follow him on [Twitter](#). At Facebook you can follow the Burton Car Company and its latest developments. Events, discussions, photo's and the latest new products are first posted on our Facebook. Check it out [here](#)

follow us on

AutoRAI 2011

Burton will be at the AutoRAI from the 13th of April until the 23rd of April 2011. This time with the only **Worldfirst** the Burton Electric the most sustainable Sports Car in the world! Apart from 5 Burton's we will also present our new clothing line and insurance policy. Because of extensive costs this might be our last attendance to the AutoRAI.

Burton Angels

That the Burton is not just a boys dream is being proved by the Burton Angels. These lady's will show their Burton at this years AutoRAI! Fiona and Constance will proof that women and technique can go hand in hand..

Burton goes Ibiza

Burton Car Company is going to co-operate with Ducks United (Rent a Duck and a lifestyle!).

Ducks United rents out 2CV's on Ibiza and Curacao and

from this season also Burton's! Customers get apart from the ultimate feeling of nostalgic and freedom of driving with a convertible in the sun also great discounts and tips to enjoy their holiday as much as possible. People who like to rent a '2CV' or would like to life on a beautiful island and let out cars can contact Ducks United at..

www.ducksunited.com Duck ya later!

Hazard light switch

A 2CV or Burton is commonly not equipped with a hazard lights system, even though this is obligated in a lot of country's. You can fit your 2CV or Burton yourself with such a system. To do this, you'd need to fit a second flasher relay. You can read the full installation instructions [here](#)

HKVHKD

On the 26th and 27th of February the craziest Burton rally of all times is been ridden in the coldest part of the year. Also this year thirty crazy equips took part in the rally that started in Valkenswaard. We'd like to thank the organisation for the amounts of fun we had and the sales volume that came with it. The first price went to René Oude Alink and Ruud with 1375 points!

Burton sales

The spring has just started and temperatures are rising so the Burton season is started again. The best possible place to sell or buy a Burton is the Burton Car Company. With our years of experience knowledge and trust you can always find a perfect car that matches your requirements. Almost 95 percent of Burton's sales runs through us. With the upcoming summer and the AutoRAI insight this is the moment to sell your Burton at the Burton Car Company. For more information please contact Loek at (0031) 0575-546055 or at loek@burtoncar.com

BURTON 2CV PARTS

Since the creation of the Burton and 2CV pick-up by Burton Car Company, we also developed a lot of parts for the Citroën 2CV. In 2009, the development and overhauling of 2CV parts grew fast and the brand Burton 2CV Parts was introduced. Burton 2CV Parts stands for quality and durability.

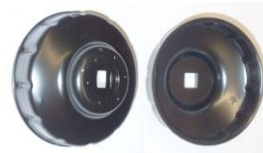

Under this brand we bring a wide range of parts on the market, in which we pursue for the best quality and an affordable price. Only parts that meet the original quality, or are just better, will earn the label Burton 2CV Parts.

There are various reasons why we decide to develop a component in-house. One of the reasons could be because of a part is not available anymore, or the quality being poor. We also developed parts to just make an improvement on the original component. For that reason we often decide to make new components of stainless steel, for example our complete exhaust-systems and various fasteners. The shape and fit of parts are also often subject to improvement. Examples include the stainless steel sleeves for adjusting the tie-rods and rubber hoses for hot air that we have created.

New and/or improved products in the Burton 2CV Parts product range

[A1.2740 socket for the oil filter](#)

Handy piece of equipment to replace the oil filter in just a blink of an eye.
Price: 7,96 euro

[A1.7708 Track rod nut with grease nipple](#)

A true improvement of the original product. By adding a grease nipple you can now easily maintain the track rod joints so that wear will be limited to a minimum. Our tool to unscrew the nut is the only one that has a hole in it that slides over the grease nipple. Price: 7,50 euro

(New!) [A2.2919 Bonnet emblem Burton white](#)

(New!) [A2.2920 Bonnet emblem Burton orange](#)

Aside of our red and black bonnet emblem we now have two new colours, white and orange. Price: 14,99 euro

[A1.2737 Brake line wrench 8mm and 9mm](#)

Special tool to unscrew the brake Lines without damaging them. This wrench is made for the old type brake lines (9 mm) and the new type (8 mm) types 2CV. Price: 11,90 euro

[A1.3921 Rear axle nut](#)

The rear axle nut 44ties is now also available in the Burton 2CV Parts product range.

Prijs: 6,55 euro

[A1.1240 CO. adjustment screw](#)

CO adjusting screw for all 2CV6 with oval carburettor.

Price: 3,95 euro

[A1.2380 2CV battery clamp with bracket for voltage regulator](#)

The battery clamp but then better.. Made from stainless steel and equipped with a bracket for the electronic voltage regulator. For a better and saver way of fitting the battery and voltage regulator.

Price: 12,50 euro

[A1.8339 Adjuster nut central suspension in stainless steel](#)

The suspension is fixed with 4 buses to centre the suspension and these buses are fixed with 8 thin nuts. We have these specially made out of stainless steel for a longer durability. Price: 7,50 euro per stuk

[A1.4517 Fixing rod for rubber cover on ignition](#)

The rubber ignition cover is originally fixed by two steel rods. We now have this made from stainless steel for a longer durability. Price: 3,99 euro

Did you know that....

- Iwan just got 40 on the 9th of February?
- The demand of overhauled engines, carburettors and gearboxes is so high that you have to wait a while?
- Marijn Backx is the engine behind the HKV HKD for years now..
- Arjen even during his holiday was confronted with a Burton? (see picture)
- Arjen is back with us at the AutoRAI for a couple of days?
