

12 september; 10 years Burton!

Ten years ago, two creative brothers with a passion for cars, built their own sportscar; **the Burton**. In 10 years time, Burton Car Company became the largest sports car factory in the Netherlands. We celebrate this anniversary with a big party on **September the 12th**.

On this day, the Burton-E is launched, probably the most durable sportscar in the world. This electric version of the Burton is not only very durable because of its low weight and efficient electric motor, but the production of this car is also environmentally friendly because of the 'cradle to cradle' principle.

Former dutch lawmaker Prof. Willem Vermeend is installed as Commissioner of Burton Car Company. Together with the Commissioner of Gelderland (the region where Burton Car Company is situated) they will reveal our electric car.

You are invited to attend this special event.

The program is as follows:

11:00h: Start program, our shop is open.

12.00h: Lecture and film Burton '10 years'.

13.30h: Installation of Prof. Willem Vermeend as Burton Commissioner.

14.00h: Unveiling Burton Electric, most durable sports car world.

15.00h: Election "Prettiest Burton of Holland"

15.15h: Presentation of the racing team for 24h of Spa-Francorchamps.

Anyone who comes with his own Burton gets a special parking spot and a VIP treatment. There will also be special offers this festive day. Furthermore, special snacks and free drinks.

Burton Electric, most durable sports car in the world!

Especially for our 10 year anniversary we unveil a whole new vision on Burton. The electrical Burton. This version of the Burton weighs only 750kg but still has a range of 120 kilometers due to its lithium iron phosphate batteries. The lightweight Burton is very efficient with an electric motor of 96volt and 16kwh. In addition, we recycle 96% of a 2CV as a donor car. The ride in this electric version is an experience that you will not forget, superb. September the 12th you can see the drive.

French REP:

Our current French representative stops his dealership, therefore we are looking for one or multiple REPS in France. For Spain, Italy, Austria and England there are also possibilities for taking on an active REP. We are looking for people who love cars, own or want a Burton showcar, and have a place to receive customers. Attending meetings, other 2CV-related-events and gaining media attention is a part of this job. The ability to speak Dutch, English or German is a big plus.

Iwan and Dimitri's mother passed away:

Marga Göbel-Carlier, mother of Iwan and Dimitri passed away on Friday, July 16,

2010. After a beautiful, intense and creative life at the age of 67 she suddenly slipped away. She was a important stimulus for our creativity and entrepreneurship, many thanks for that, dear mother!

New Products

The past two years we developed at least one new product every week. We are a small organization, but nonetheless one of the more innovative companies in Europe. Customers from the UK can visit our stand on the UK national meeting in Winchester, this weekend (26 to 30 Aug.). Hereby a selection off our new products:

Burton Jetset

People who have experience with testing 2CV's on a dynamometer know that a lot of gain in horsepower can be achieved with changing the jets in the carburettor. This works great in combination with our Power-tube ([A1.4504](#)). Now we can offer a set with 22 (primary and secondary) jets for the Solex carburettor to experiment with. Soon available on our webshop. [A1.1230](#)

Bracket air filter stainless steel

The original air filter of a 2CV is supported with two brackets. After the U-bracket in stainless steel, we also made the tubular bracket available in stainless steel. Price € 15.00 [A1.2529](#)

Seal for folding window 2CV

The old windowseals of the 2CV were worthless, because did not hold on to the lower window when you opened them! Our new rubbers fit more tight, and remain stuck. Price € 3.50 each! [A1.1971](#)

Taperlock gearbox/engine

We have developed original taperlocks that mount between the engine and gearbox. These bushes are sometimes missing but are crucial to engine and gearbox. Price € 2.50

Set moon discs

Back in the day many cars had wire wheels. Only luxury cars had special smooth hubcaps for a Sunday drive, because people liked the look. Especially for people who still like it, we have super-tough stainless steel polished hubcaps (also called moon discs) for a very affordable price of € 99.00 per set of 4. They also help aerodynamics, and therefore common on the salt-flats of Bonneville and on feal-saving vehicles. [A1.9323](#)

Stainless steel entry-strips:

The polished stainless steel entry guards for the Burton permanently reduced in price. From € 35.00 for only € 19.95 per set. [A2.1728](#)

Holder for spare:

For the Burton, we have a holder for the spare wheel made of aluminum. When the spare wheel is stored in the engine compartment, extra luggage-space is available. The price is € 49.00. [A2.5803](#)

**Did you know that...**

- ...we still search Burton-photo's for our book in the making?
- ...internet orders are being sent as normal during our holidays?
- ...our assistant Pascale participates in the dutch 'Popstars'?
- ...our orange Worldcup Burton was even seen on CNN?
- ...our new components brand 'Burton 2CV Parts' is very successful?
