

## NEWSLETTER DECEMBER 2009

### Anti junk mail law

This is already the last news letter of this year, and also the first one that is made according to the new laws concerning junk mail. You can easily sign in or out for our news letter via our website. You can also sign off by clicking [here](#).

### Looking back at 24H of Spa Francorchamps

When we entered box 42 on Saturday 17 October, we spontaneously got the shivers. A very motivated and professional racing team was ready to race with our own Burton. Over 24 hours driving with high speed in an open Burton with rain, glazed frost and cold is not meant for sissies! Every lap and each performance made us warmer and warmer. The race was not only completed, the racing team with the Burton also got the third place! Next year, Burton will join in again, maybe with even more cars!

### Supply of bodies

The last couple of months we have solved the problems with the supply of bodies. The production in the Czech Republic is raised for a while, and now 16 hours per day and 7 days in the week people are working on them. We have already lowered the supply time from 8 to 4 months. We also try to make sure that we have a primer body (for those who want to spray-paint their car) and a body in standard colours in stock.

### Offer chassis

We have made an offer on the kataforese chassis. This chassis is validated by the RDW in order to replace the old chassis. It is temporarily priced € 595,- instead of € 695,- (as long as our stock lasts).

If you want to treat the chassis also with extra rust-preventing tectyl (ML), it will cost you € 715,-.

We also offer:

A special polishing set for the treatment of gelcoat, from € 79,- for € 49,-.

### New Year reception and Burton club activities

Saturday 9 January 2010, everybody is welcome from 1PM for our New Year Reception (glühwein, hot chocolate, fritters and old and new plans). After that at 2.30PM, we would like to invite you to help us think about the set-up of the Burton Owners Club and we would like to hear who of you wants to help organize trips and events, and who wants to be part of the Burton Owners Club any other way.

### Burton driving impression by Autogetest.nl

A journalist from the website [Autogetest.nl](http://Autogetest.nl) has tested a Burton, and made a nice report and a video about it. Each Burton owner will recognize his story. Have a look at the video and the report by clicking [here](#).

## New Products

### Stainless steel bracket for anti-fog lamps

Already some years we have a Hella high-beam headlamp in our assortment. From now on, we also have a new stainless steel bracket that makes the assembly of these high-beam headlamps easier. Of course, these brackets are also applicable for other high-beam headlamps. These can be ordered in our webshop for €30,- per set (search for 'verstraler' or article code [A2.5381](#)).

### Cap 14 for fan and cap 26 for shock absorber bolts

We have created two more special tools for the 2CV: a tall and narrow cap 14 for disassembling the fan and a long cap 26 for the bolts with which the shock absorbers are assembled. These caps fit on a ratcheted wrench with connector 3/8 inch. [A1.2701](#) and [A1.2700](#).

### Indicator O-ring

The rubber ring that is assembled around the glass of the Burton front indicators can perish because of the sun. We have new ones for only €2,50 each. [A2.5321](#).

### MOMENTSLEUTELS

From now on, we also have several torque wrenches in our assortment. We have a small one that fits to your wrench with 1/4 inch or 3/8 inch connector, with which you can pull from 6 to 30 Nm. We also have a larger one for a wrench with a 1/2 inch connector, with which you can pull 40 to 210 Nm. If you order both, you can apply all the torques that are dictated in the various manuals. Good idea for Christmas?

Small torque wrench	€ 49,-	<a href="#">A1.2749</a> or <a href="#">A1.2747</a>
Large torque wrench	€ 65,-	<a href="#">A1.2745</a>
Offer together	€ 99,-!!	<a href="#">A1.2751</a>

**Lamp sleeve for dashboard lights**

The clocks of the Burton are standard illuminated in white. Now it is possible to change these colours with the aid of little coloured sleeves in red, green, orange or blue! [A1.4160](#)

**Cover for Burton softtop**

A neat cover is designed for the Burton softtop. It is made of black imitation leather and has a sturdy zip. In this cover the softtop will fit perfectly behind the seats of bench in your car. [A2.1380](#)

**Burton Tip:****Fender bracket:**

When assembling the fender brackets, take into account the huge suspension travel of the 2CV chassis. The fender brackets cannot be assembled too far to the front of the car, because with a hole in the road, the wheel can travel so much that it can hit the bracket.

**Did you know that...**

- Dimitri has been to the Czech Republic already 4 times to optimize the body production?
- Burton number 0001 has already driven 400.000 km? 180.000 as a tin snail and 220.000 more as a Burton?
- A 2CV actually uses super 98 but will also run fine on euro 95?
- Iwan, Dimitri en Martin all have become father (again) in May and April?
- We work together with the HAN Hogeschool on the development of the electric Burton-E?

**Agenda**

- 11,12 and 13 December 2009
- 25-12-'09 until 04-01-'10
- 09-01-2010
